### WOLF FLAME SAFETY LAMPS

WOLF Lamps have always been known as reliable and trouble-free lighting lamps. In this respect, our Wolf Flame Safety Lamps, being important factors of their design have been improved but simplified, resulting in sturdier, lighter and more compact lamps. All have round necks, rubber and glass joints, Wolf lamp-type magnetic locks and a double air feed and shut-off. All lamps are standard and all lamps have the same glass, glass and neck, and the same feet and base frame to facilitate interchange.

Four lamps are available suitable for use under the Coal and Other Mines (Safety Lamps and Lighting) Regulations 1955.

No. 1 and 2 are suitable for use under Coal Mines (General Regulations) (Firearmy Districts) 1955, and No. 3 and 4 under Coal Mines (Offshore and Independent General Regulations) 1955. (These Regulations apply to safety lamps for use in Great Britain).
